Driving Innovation at Speed and Scale

Maximus empowers federal agencies in health, civilian, defense, and national security to achieve greater outcomes, faster. We combine mission expertise with industry leading technologies – AI, machine learning, cybersecurity, cloud, and more – to simplify complexity and drive measurable results. Our scalable solutions and agile approaches rapidly deliver program modernization by transforming operations, streamlining for efficiency, and advancing missions with impact. For agencies ready to move faster and achieve more, we have the experience and the innovation to deliver government transformation.

Federal Services Overview

Streamlined Impact at Scale

Our operational expertise enables customer centric solutions that deliver measurable results. By optimizing efficiencies, simplifying processes, and fostering innovation, we drive mission readiness.

Scalable Service Delivery Models

Our scalable service delivery models are designed to adapt, scale, and deliver results:

- **Fully Managed Services:** End-to-end execution ensures seamless operations focused on strategic priorities.

- **Solution Services:** Proven, operationally tested solutions eliminate complexity, fast-track implementation, and deliver high-impact outcomes.

- **SME Services:** Industry-leading expertise and insights to optimize performance while delivering full-service custom and scalable solutions.

Mission-Based Solutions

We solve complex challenges facing government by combining industry and commercial innovation. Powered by FedRAMP-authorized services, we enable federal agencies to maximize resources, scale operations, enhance performance, and accelerate mission success.

Innovation-Driven Modernization

We are committed to delivering outcomes that improve citizen services. Scalable and modular by design, our teams are equipped to adapt quickly, integrate seamlessly, and drive lasting impact across diverse government initiatives.

Technology Services

Customer experience is in our DNA, and we accelerate it through human-centered design and cutting-edge technology to drive rapid, mission-ready solutions. By harnessing innovation at speed, we create transformative outcomes that don't just meet today's challenges—they redefine what's possible for tomorrow.

- Apply innovative technologies across secure, agile architectures that connect workforces, citizens, and missions
- Harness the full potential of enterprise data to drive innovation and collaboration
- Intelligently scale operations and services to rapidly enhance citizen services and meet mission objectives
- Actively secure sensitive data, complex systems, and critical business operations for trusted, secure information and services
