

# Setting up Amazon WorkSpaces – video transcript

Part 2. Download and install the Amazon WorkSpaces Client.

Click this link or enter it into your PC web browser that you see on your screen during this video, or go to <https://clients.amazonworkspaces.com/>. This will direct you to the amazon workspaces website where you will download your client.

You will see that there is a variety of different systems that you can download for. You will be clicking the download for windows or the download for Apple depending on which system you have.

Click the “Save” button after the download.

When prompted, you are going to click run to start the installer.

After the software has been installed, double-click the Amazon WorkSpaces icon on the desktop, or open the Windows Start menu and select Amazon WorkSpaces.

A window will then appear asking you to enter your registration code.

Enter the registration code provided by your supervisor and click Register.

In the Username field, enter your MAXIMUS employee ID number.

In the Password field, enter your MAXCORP password.

On your mobile device, open the OneLogin Protect app. Note the number displayed.

And, in the MFA Code field, enter the number shown in your OneLogin Protect app from your phone.

You will then click “Sign In”.

After a successful login, the Amazon WorkSpaces client launches your workspace.

Your virtual desktop appears after a few moments.
